

Kidney Health Evaluation for Patients with Diabetes (KED)

2024 Performance Year

Commercial, Medicaid, Medicare

Measure Description

The percent of patients 18-85 years old with diabetes (type 1 and type 2) who received a kidney health evaluation defined by an estimated glomerular filtration rate (eGFR) **and** an urine albumin creatinine ratio (uACR) during the performance year on the same or different dates of service.

Required:

- At least one eGFR during the performance year
- At least one uACR during the performance year identified by either of the following:
 - A quantitative urine albumin test and a urine creatinine test with service dates four or less days apart
 - A uACR

Required Exclusions

- Patients receiving palliative care or had an encounter for palliative care anytime during the performance year
- Patients in hospice or using a hospice benefit anytime during the performance year
- Patients who passed away anytime during the performance year
- Patients with evidence of end stage renal disease (ESRD) or dialysis anytime during the patient's history through the end of the performance year

*Note: The following exclusions are closed by **claims only**.*

- Medicare patients 66 years of age and older as of the end of the performance year who meet either of the following: enrolled in an Institutional SNP (I-SNP) or residing in long-term care as identified by the LTI flag in the CMS Monthly File any time during the performance year
- Patients 66-80 years of age and older as of the end of the performance year with two frailty indications on different dates of service in the performance year **and** an advanced illness diagnosis on at least two different dates of service or dispensed dementia medication during the performance year or 12 months preceding the performance year.
- Patients 81 years of age and older as of the end of the performance year with two frailty indications on different dates of service during the performance year.

Documentation Tips

- **Use CPT codes** to lessen the administrative burden of manual chart reviews.
- Reminder: A urinalysis alone will NOT close this care opportunity.

Common Codes

82043- Quantitative Urine Albumin Lab Test **AND 82570-** Urine Creatinine Lab Test

80047, 80048, 80053, 80069, 82565- Estimated Glomerular Filtration Rate Lab Test
