

## Child and Adolescent Well-Care Visits (WCV)

### 2024 Performance Year

Commercial and Medicaid

#### Measure Description

Percentage of patients ages 3-21 years who had one or more comprehensive well-care visits with a primary care provider or OB-GYN during the performance year.

#### Required Exclusions

- Patients in hospice or using a hospice benefit anytime during the performance year
- Patients who passed away anytime during the performance year

#### Measure Tips

- If a provider is seeing a patient for Evaluation and Management (E/M) services and **all** well-child visit components are completed: Attach modifier -25 or -59 to the well-child procedure code so it's reviewed as a significant, separately identifiable procedure.
  - **Modifier -25** is used to indicate a significant and separately identifiable evaluation and management (E/M) service by the same physician on the same day another procedure or service was performed.
  - **Modifier -59** is used to indicate that 2 or more procedures were performed at the same visit, but to different sites on the body.
- Utilize reporting made available to you to identify the patients who need well-child visits
- The well-child visit must occur with a PCP, but the PCP does not have to be the practitioner assigned to the child.
